AI-generated explicit images

With the rising use of AI, explicit nonconsensual images can be generated easily and without the victim's knowledge. An offender now may not even need an explicit image to work from. When threatened with explicit AI-generated images being published or distributed online, victims often succumb to demands for money, in-person meetings or worse. This can affect anyone, regardless of age or gender - but children are most at risk. For more information, read the VIRTUS® article "The Take It Down Act: Combating Non-Consensual Intimate Imagery and Sexual Exploitation" at lacatholics.org/did-you-know.
