The challenge of complacency

Safe adults often move through the world with a heightened awareness of what could be suspicious behavior and warning signs – this may feel overwhelming. If they never encounter abuse, they could easily become complacent – thinking there is no potential for abuse because they have not seen it in their own lives. The antidote to complacency is to always remember the end goal: the safety and well-being of the children and vulnerable people in our parishes, schools, ministries and communities. For more information, read the VIRTUS[®] article “The Challenge of Complacency” at lacatholics.org/did-you-know.
